## Experience

### Randstad

(Dec 2021 - Oct 2024)

Bengaluru (**Data Analyst**)

- Designed and developed **20+ interactive Power BI dashboards** covering business performance, operations, HR, finance, and management KPIs. Created **50+ Ad hoc reports** for management to support decision-making.
- Built recruitment performance dashboards tracking time-to-hire, conversion rate, and recruiter productivity in **Power BI**.
- Developed client revenue and sales performance dashboards using CRM and billing data.
- Performed workforce and attrition analytics to support HR decision-making.
- Delivered frequent ad hoc and MIS reports using SQL and Excel, reducing manual effort by 30–40%.

### Priacc Innovations Pvt Ltd

(Jun 2025 – PRESENT)

**Internal Project, Hyderabad – (Power BI Developer)**

- Architected **end-to-end reporting solutions** including data cleaning, transformation (Power Query), data model, and visualization.
- Maintained automated **Power BI dashboards** for monthly sales reporting using **n8n**, enabling automatic extraction of CSV files from Gmail and scheduled refresh in Power BI Service.
- Automated manual Excel reports using Power BI, **reducing reporting time by ~60–70%**. Architected **DAX measures** for KPIs like Growth %, MoM, YoY, averages, rankings, trends, variance, and standard deviation analysis
- Worked with multiple data sources (Excel, CSV, SQL) and delivered drill-through, tooltips, slicers, dynamic titles, and role-based views.

## Projects

### Business 360 - Brick & Mortar and e-commerce

(Nov 2025 - Dec 2025)

- Deployed a multi-view dashboard in **Power BI** for 6 departments (sales, finance, supply chain, executive, marketing, and products) of AtliQ Hardware to understand sales trends, facilitate data-driven decisions that scaled the business processes by **10%**.
- Imported 2 different data sources (**MySQL, and Excel**) with more than **1 million records** and performed data modeling.
- Optimized the report using **DAX Studio**, which saved 30% of storage and improved performance by 10%.

**Invoice Automation Pipeline** - (PDF & Image → Google Sheets using **n8n, Make, OCR.Space API, LLMs**) (Jan 2026 - Jan 2026)

- Designed and deployed an end-to-end invoice processing **automation** using **n8n, OCR, and LLMs** to extract structured data from PDF and image invoices and store it in **Google Sheets**, eliminating manual data entry and improving processing efficiency by **80%**.
- Built a robust document ingestion pipeline to handle mixed file types (scanned PDFs and images), implemented base64 normalization.
- Implemented a JSON-schema-driven information extraction layer to capture invoice headers and line items (items, quantities, prices, totals), producing analytics-ready, normalized datasets for reporting and downstream analysis.
