Experience

Priacc Innovations Pvt Ltd **(Jun 2025 – PRESENT)**

Internal Project, Hyderabad – (**Data Analyst**)

- *Architected **end-to-end reporting solutions** including data cleaning, transformation (Power Query), data model, and visualization.*
- *Maintained automated **Power BI dashboards** for monthly sales reporting using **n8n**, enabling automatic extraction of CSV files from Gmail and scheduled refresh in Power BI Service.*
- *Automated manual Excel reports using Power BI, **reducing reporting time by ~60–70%**. Architected **DAX measures** for KPIs like Growth %, MoM, YoY, averages, rankings, trends, variance, and standard deviation analysis*
- *Worked with multiple data sources (Excel, CSV, SQL) and delivered drill-through, tooltips, slicers, dynamic titles, and role-based views.*

Randstad **(Dec 2021 - Oct 2024)**

Bengaluru (**Data Analyst**)

- *Designed and developed **20+ interactive Power BI dashboards** covering business performance, operations, HR, finance, and management KPIs. Created **50+ Ad hoc reports** for management to support decision-making.*
- *Built recruitment performance dashboards tracking time-to-hire, conversion rate, and recruiter productivity in **Power BI**.*
- *Developed client revenue and sales performance dashboards using CRM and billing data.*
- *Performed workforce and attrition analytics to support HR decision-making.*
- *Delivered frequent ad hoc and MIS reports using SQL and Excel, reducing manual effort by 30–40%.*

Projects

Business 360 - Brick & Mortar and e-commerce **(Nov 2025 - Dec 2025)**

- *Deployed a multi-view dashboard in **Power BI** for 6 departments (sales, finance, supply chain, executive, marketing, and products) of AtliQ Hardware to understand sales trends, facilitate data-driven decisions that scaled the business processes by **10%**.*
- ***ETL** in Power Query refers to the process of **Extracting** data from multiple sources, **transforming** it using cleaning and shaping steps, and **loading** it into a destination like Excel or Power BI.*
- *Optimized the report using **DAX Studio**, which saved 30% of storage and improved performance by 10%.*

Invoice Automation Pipeline - *(PDF & Image → Google Sheets using **n8n, Make, OCR.Space API, LLMs**)* (Jan 2026 - Jan 2026)

- *Designed and deployed an end-to-end invoice processing **automation** using n8n, OCR, and LLMs to extract structured data from PDF and image invoices and store it in **Google Sheets**, eliminating manual data entry and improving processing efficiency by **80%**.*
- *Built a robust document ingestion pipeline to handle mixed file types (scanned PDFs and images), implemented base64 normalization.*
- *Implemented a JSON-schema-driven information extraction layer to capture invoice headers and line items (items, quantities, prices, totals), producing analytics-ready, normalized datasets for reporting and downstream analysis.*
