

Shaik Jaffer Hussain

Power BI Developer | Business Intelligence & Data Analyst | SQL

Contact: [9603739523](tel:9603739523) | [GitHub](https://github.com/jaffershaik11) | [LinkedIn](https://www.linkedin.com/in/jaffershaik11) | jaffershaik11@gmail.com

Detail-oriented Power BI Developer and Data Analyst with **4.5+ years of total professional experience** in data analysis, reporting, and business intelligence, including **1.7+ years of hands-on experience in Power BI, SQL, and DAX-based BI development**. Skilled in data modeling, Power Query (ETL), dashboard development, and performance optimization, with a strong foundation in data cleaning, validation, and large-scale data quality analysis. Proven ability to analyze business requirements and deliver scalable, accurate BI solutions that drive data-driven decision-making.

Skills

Power BI - Power Query, Power BI Service, Power BI Gateway, DAX, Data Modeling, Data Cleaning, ETL, Visualizations, RLS, OLS
SQL - Data types, Queries, Aggregate functions, Subqueries, Joins, CTEs, Window functions, Views, Ad hoc Analysis
Excel - VLOOKUP, XLOOKUP, Index, Match, Pivot Tables, Pivot Charts, Data Validation, sumifs, Data Integration
Core Competencies - Cross-functional Collaboration, storytelling, Process Optimization, Data Integrity Assurance, Stakeholder Reporting

Experience

Tata Consultancy Services

(Oct 2024 – PRESENT)

Hyderabad – (Power BI Developer)

- Built interactive dashboards and reports using **Power BI Desktop and Service** with strong storytelling approach, delivering 10+ dashboards across departments
- Designed structured datasets using **star schema**, relationships, and fact-dimension architecture
- Developed advanced **DAX calculations** including time intelligence and dynamic **KPIs**
- Executed **ETL workflows** through **Power Query** for **data cleaning**, transformation, and reshaping. Connected multiple sources such as **databases, CSV, spreadsheets, APIs, and cloud platforms**
- Engineered efficient queries in relational systems for extracting and transforming datasets. Applied role-based access control through **Row-Level Security** for secure data visibility
- Deployed solutions on cloud platform with workspace management and automated **Schedule Refreshing**. Enhanced performance by optimizing models, **reducing redundancy**, and improving calculation efficiency, cutting report load times by up to 30%
- Implemented advanced features like **drill-through, bookmarks, tooltips, and dynamic visuals**
- Wrote complex SQL queries using **JOINS, subqueries, and CTEs** for data extraction and analysis. Performed data aggregation using **GROUP BY, HAVING, and window functions** (ROW_NUMBER, RANK, DENSE_RANK)
- Optimized query performance through **indexing, query tuning, and execution plan analysis, reducing query execution time by up to 25%**
- Created and managed **views, and temporary tables**. Worked with relational databases like **SQL Server / MySQL** for data integration with Power BI
- Utilized advanced formulas like **VLOOKUP, XLOOKUP, INDEX-MATCH, IF, and COUNTIFS**. Built **Pivot Tables** and **Pivot Charts** for data summarization and reporting
- Performed data cleaning using **text functions, conditional formatting, and data validation**. Automated tasks using basic **macros** and **Excel shortcuts**

Randstad

(Dec 2021 – Oct 2024)

Bengaluru – (Data Analyst Operations)

- Executed detailed brand identification and data cleaning analysis across 500+ unique URLs provided via spreadsheets
- Verified the presence of major sportswear brands like **Nike, Puma, Adidas** while ensuring data accuracy during the process.
- Delivered high-accuracy, ready-to-use datasets within tight turnaround times, supporting client reporting and business decision-making.
- Identified recurring data quality issues in source spreadsheets and suggested process improvements to reduce manual rework.
- Maintained detailed trackers in **Excel** to log analysis progress, quality checks, and completion status across large batches of records.

Projects

Business 360 - Brick & Mortar and e-commerce

(Nov - Dec 2025)

- Deployed a multi-view dashboard in **Power BI** for 6 departments (sales, finance, supply chain, executive, marketing, and products) of AtliQ Hardware to understand sales trends, facilitate data-driven decisions.
- Built ETL pipelines in Power Query to **extract, clean,** and load data from multiple sources, **transforming** it using cleaning and shaping steps, and **loading** it into a destination like Excel or Power BI.

- Optimized the report using **DAX Studio**, which saved 30% of storage and improved performance by 10%.

Invoice Automation Pipeline - (PDF & Image → Google Sheets using **n8n**, **Make**, **OCR.Space API**, **LLMs**) (Jan 2026)

- Designed and deployed an end-to-end invoice processing **automation** using **n8n**, **OCR**, and **LLMs** to extract structured data from PDF and image invoices and store it in **Google Sheets**, eliminating manual data entry and improving processing efficiency by **80%**.
- Built a robust document ingestion pipeline to handle mixed file types (scanned PDFs and images), implemented base64 normalization.
- Implemented a JSON-schema-driven information extraction layer to capture invoice headers and line items (items, quantities, prices, totals), producing analytics-ready, normalized datasets for reporting and downstream analysis.

Healthcare Analytics Dashboard (End-to-End BI Solution) (Feb 2026)

- Designed a star schema data model and built interactive Power BI dashboards using **SUM**, **DISTINCTCOUNT**, and **CALCULATE** measures to track patient and revenue KPIs
- Developed advanced DAX measures using **AVERAGEX**, **DATEDIFF**, **DIVIDE**, and **RANKX** to benchmark doctor and department performance and surface KPI growth insights
- Implemented time intelligence calculations using **TOTALYTD**, **TOTALMTD**, and **SAMEPERIODELASTYEAR** to track revenue growth and business performance trends
- Performed data transformation using Power Query (M) including merge, append, pivot, and unpivot to prepare structured, analytics-ready datasets
- Wrote optimized SQL queries using **JOIN**, **CTE**, **GROUP BY**, and window functions (**ROW_NUMBER**, **RANK**) for data extraction, billing analysis, and demographic reporting by city and gender

Supply Chain Inventory Dashboard (End-to-End BI Solution) (Mar 2026)

- Designed star schema data model connecting Products, Suppliers, Orders, and Shipments, and developed KPIs using **COUNT**, **SUM**, and **CALCULATE** for order tracking and performance analysis
- Built inventory and revenue metrics using **SUMX** with **RELATED** to calculate inventory value based on quantity and unit price
- Developed delivery performance metrics using **AVERAGEX** and **DATEDIFF** to analyze average delivery time and logistics efficiency
- Implemented time intelligence using **TOTALYTD**, **TOTALMTD**, and **SAMEPERIODELASTYEAR** to track order trends and YoY growth
- Performed data transformation using Power Query (M) including merge, data type conversion, and deduplication, and created SQL queries using **JOIN**, **GROUP BY**, and window functions like **ROW_NUMBER** and **RANK** for supplier performance analysis

HR Analytics Dashboard | Power BI, SQL, Excel (Apr 2026)

- Designed an HR dashboard to analyze attrition, workforce trends, and salary distribution, with KPIs built using **COUNT**, **CALCULATE**, and **DIVIDE**
- Implemented time intelligence using **SAMEPERIODELASTYEAR** and **DATEADD** to track headcount and attrition trends over time
- Developed advanced insights including attrition rate, average tenure, and department-wise salary benchmarking using **AVERAGEX** and **DATEDIFF**
- Performed ETL using Power Query and SQL for employee data transformation, and built interactive slicers to break down gender composition by department
- Built interactive Power BI visuals to monitor attrition rate as a trackable KPI, enabling proactive workforce retention decisions

Certifications

- [Codebasics.io](https://codebasics.io) – AI Automation Certification
- Keyboard Typing Certification with **45+ WPM**
